Thanks Amanda,

That's a good catch. The sections that you mention list BAAQMD, which is local, but leaves out other local agencies that are doing modeling including the DM/NFR, Las Vegas, Albuquerque, and Phoenix.

Hi all,

I wanted to provide one minor comment on Appendix E. On page 76, under XI.a.ii, I wanted to see if you would mind including "and local" in "other state agencies doing regional ozone modeling". We do work closely with the State of Colorado, but the ozone modeling efforts for the DM/NFR nonattainment area come from our agency and we plan to do quite a bit of regional modeling over the next couple years including transport modeling as well as zero out modeling for international background ozone for a potential 179B demonstration. I would also like to see this same change made on page 7 of the work plan if appropriate.

Thanks in advance,

~Amanda
